

- your service partner for paediatric research and development

PaediaCRO offers services for every stage of paediatric drug development- from paediatric trial planning, PIP development and conducting clinical trials to publication in peer-reviewed journals. Our success is driven by our people and their commitment to get results the right way by working according to the highest ethical standards and executing with excellence.

For our office in Munich we are looking for a

Clinical Research Associate

The responsibility of a Clinical Research Associate (CRA) is to act as communication link between sponsor and investigators in accordance with ICH GCP guidelines. At PaediaCRO, you will also be involved in all stages of paediatric drug development.

You have:

- Education to degree level (biological science, pharmacy or other health-related discipline preferred), equivalent nursing qualification or other equivalent experience.
- Strong computer and internet skills including knowledge of MS-Office products such as Excel, Word Power Point, Outlook.
- Regulatory knowledge including GCP.
- Ability to successfully work in a team environment.
- Sound presentation skills.
- Effective time management in order to meet daily metrics or team objectives.
- Ability to travel up to 80% on average and holds a driving license where required.
- Language Skills: Competent in written and oral English.

We offer a position in a highly ethical research area. You will have a close cooperation with all your colleagues from different areas and upper management and you will be involved in all major areas of clinical trials.
